

## Parents of children aged 5-9 interested in using Fledge:

Fledge and the University of Calgary are researching the effectiveness of the use of the Fledge app in the classroom on different aspects of children's well-being, including stress, anxiety, focus, attention, social interactions and emotional regulation.

We are interested in hearing from parents of children aged 5-9 about Fledge app use. Participating families will receive:

- Free access to the Fledge app
- A \$20 CAD gift card for completing three 10-minute surveys
- An additional \$20 CAD gift card for participating in a focus group (e.g., Amazon, Indigo, Starbucks, Tim Hortons).

The University of Calgary Ethics has approved this study (REB22-1835\_MOD2)

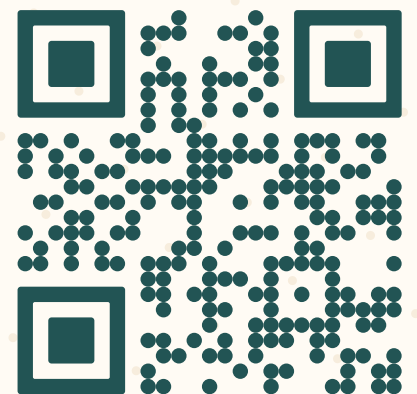

The agency you are receiving this poster from will not know whether you choose to participate and will not have access to the data. Your relationship with the agency and services you are receiving will not be affected by your involvement in this project.
